

PLASTERMAN

THE PLASTERING MACHINE
FOR REAL MEN.

DON'T BE A BOY
BE A MAN.

PLASTERMAN

COMPACT AND POWERFUL.

Compact design and powerful components are what make the PLASTERMAN an indispensable machine for plasterwork on construction sites.

PUMP MOTOR

With its 5.5 kW, the pump motor provides just the right amount of power.

FILLING CONTAINER

The PLASTERMAN can easily be filled with the plaster material via the filling container.

COMPRESSOR

400 V for an output up to 220 lt./min.

WATER PUMP

The water pump pumps the water required for mixing the plaster material.

PLASTERMAN

ELECTRICALLY POWERED PLASTERING MACHINE.

The solid construction of the selected components ensures PLASTERMAN's high quality, which more than meets the demands of the construction site. The high-quality parts give PLASTERMAN its notable reliability and performance.

PLASTERMAN	
Operating voltage	400 V - 50 Hz
Pump motor	5,5 kW
Star wheel motor	0,75 kW
Compressor	400 V - 220 lt./min
Water pump	400 V - 50 Hz
Power	about 5-70 lt./min
Weight	about 270kg

Made in Germany

PROCESSING OF BUILDING MATERIALS.

Its sophisticated design allows the PLASTERMAN to always provide optimum performance. It is not a problem to process different kinds of materials. Such diverse materials include renovating plasters, gypsum plasters, lime-cement plasters and insulation plasters, which can all be easily processed.

TRANSPORT AND MOBILITY.

With its highly compact design and reduced weight, the PLASTERMAN is ready to be used on site quickly and without major problems. Its large wheels make it extremely mobile, which greatly aids work on construction sites as well as transportation to the site.

OPERABILITY

The PLASTERMAN is designed to be very simple to operate. This not only saves time, but also relieves stress and ensures a smooth plastering process.
