PRIME TERRAZZO UAE

We are committed to supplying our customers with high-quality, industry-leading products and services that stand the test of time.

Terrazzo is a composite material that is made of chips of marble, quartz, granite, glass, shells and other decorative stones, that is held together by either a cement or epoxy resin binder.

Today, epoxy terrazzo is widely used. The terrazzo system is poured over level concrete. It has a unlimited color options, making it ideal for decorative patterns and designs. The system also provides a seamless surface that is much thinner and lightweight than cement terrazzo, but more durable, flexible, and less susceptible to cracking. Epoxy terrazzo is considered the the most cost effective flooring system available, and is a product that optimizes life-cycle performances, reduces operating costs and enhances the beauty and value of any building structure.
