ECLAT SMART TECHNIVAL SERVICES LLC

Company Profile

PrimePergolaUAE / PrimefloorUAE / PrimeInteriorfitoutUAE / PrimeRenovationUAE / PrimefoldingdoorsUAE / PrimeTerrazzoUAE

Our Vision - High quality services to each Client

Our Mission

Our Mission, by using our human, financial and intellectual resources in a teamwork environment, is to execute contracts using state-of- the-art technology, to deliver on schedule competitively priced quality products, and to strive for continual improvements in quality, technology, safety and Customers' satisfaction.

Our Goals

Goals of our company are:

1. Safety first, do not neglect it.
2. High quality of works and services performed.
3. Be on time, follow schedule.

About
ECLAT SMART TECHNICAL SERVISCES L.L.C.
SERVISCES L.L.C.

ECLAT SMART TECHNICAL SERVISCES L.L.C. are the market leader in FitOut, Renovation, Design, Pergolas, Aluminum and Glass Systems, Decorative Flooring Systems, etc. Founded in Dubai UAE. ECLAT STS are as well - established and trusted name within the construction industry.

We pride ourselves on our vast product range any tightly controlled processes, with specific emphasis placed on quality, service, sustainability and above all customer needs.

We honor each other and our clients with

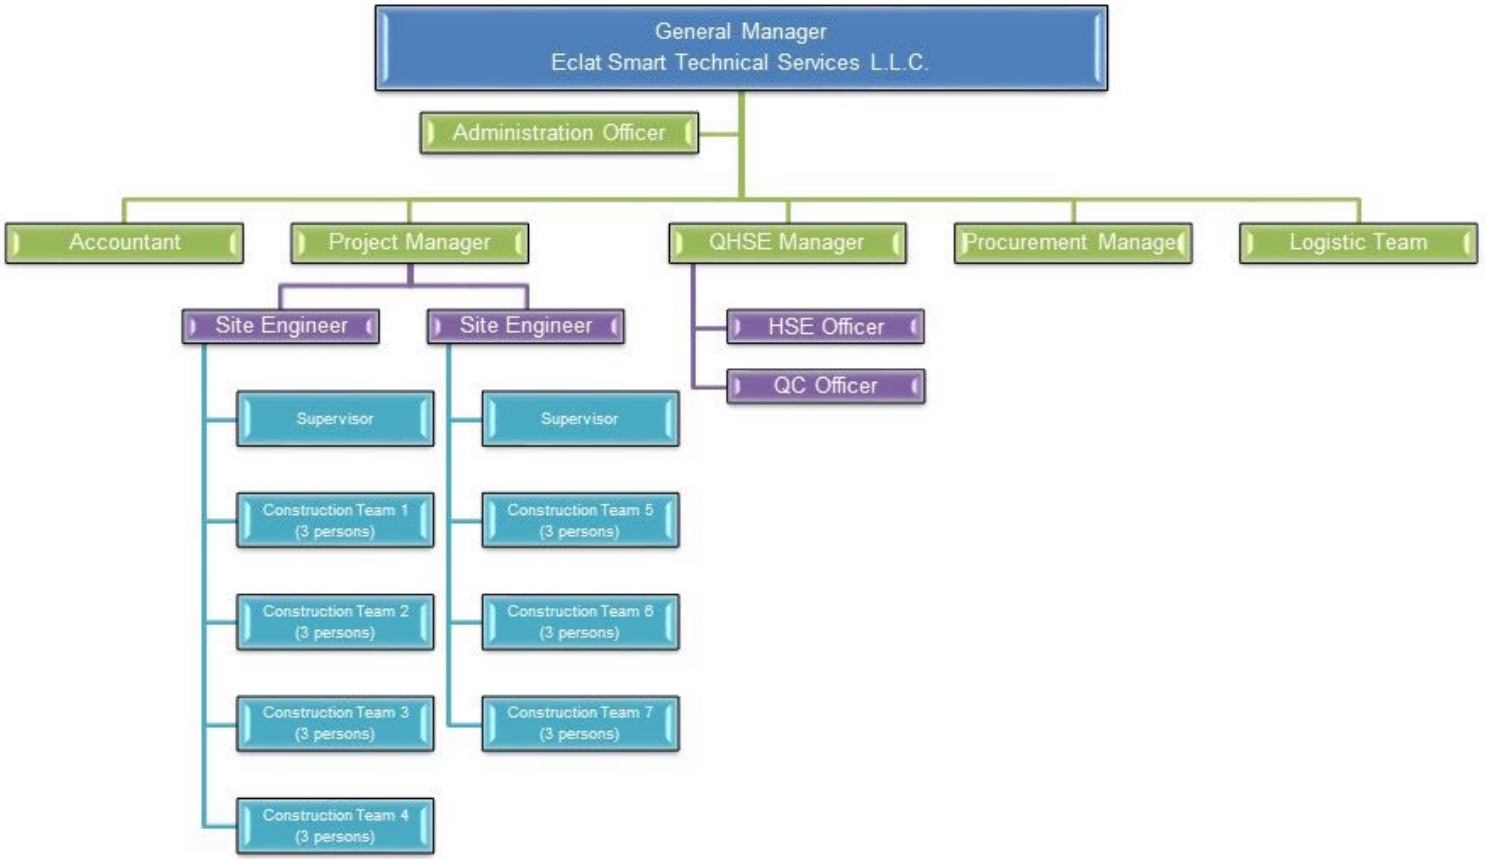
fairness and respect. We value straight forward, open communications that foster productive long-term relationships.

We working under the **ISO 9001 Quality management System.**

We love what we do, and who we do it with. Our mission is to perform all projects to the complete satisfaction of our Customers in terms of timing, cost, health, safety and security requirement

ECLAT SMART TECHNICAL SERVICES

Organizational Chart



OUR EXPERIENCED TEAM HAS PARTICIPATED IN THE FOLLOWING PROJECTS:

- ✓ **W Resort Hotel & Residence. The Palm. Dubai**

Installation of Aluminium Composite Cladding	- 7600 sq.m;
Installation of Semi unitized Curtain Wall Panels	- 4200sq.m;
Installation of Sliding Doors	- 3350sq.m;
Installation of GRP Panels	- 9800L.m;
Installation of Glass Balustrades	- 1680L.m.
Client:	Technical Glass & Aluminium Co L.L.C.
Main Contractor:	Al Futtaim Carillion

- ✓ **Dr. Riad Al Jord Hospital. Healthcare City. Dubai**

Floor Screed:	- 7700 m², thickness – 100mm
Lightweight concrete:	- 310 m², thickness – 500mm
Drywalls:	- 2000 m²
Epoxy coating:	- 2000 m²
Linoleum	- 5000 m²
Client:	Dr. Riad Al Jord
Main Contractor:	Adnan Contracting LLC

- ✓ **(2B + G + 7 Floors + Roof) 4 star hotel. Bur Dubai. Dubai**

Floor Screed:	- 8,150 m², thickness – 100mm
Plastering:	- internal 9000 m², thickness – 15mm
Tiles:	- floor tiles 1200 m²
Epoxy coating:	- 2200 m²
Client:	CONNECT WORLD TRAVEL & TOURISM L.L.C
Main Contractor:	AL AWTAN CONTRACTING L.L.C
Consultant:	NEXT ENGINEERING CONSULTANTS

- ✓ **Hilton Project, 6 Villas. RAK**

Floor Screed:	- 6,800 m², thickness – 100mm
Client:	ROSTAMANI Building Industries
Main Contractor:	ROSTAMANI Building Industries

- ✓ **Festival City Extension, Dubai**

Aluminium Curtain Wall	- 1140sq.m;
ACP Cladding	- 1980sq.m;
Folding Doors	- 570sq.m;
Lime Stone Cladding	- 920sq.m;

Decorative Stanley Steel and Balustrade Works.

- ✓ **KHANSAHEB Labor Camp. Jebel Ali. Dubai**

Floor Screed:	- 2,300 m², thickness – 70mm
Partitions with lightweight concrete density 500 kg/m² -	300 m^3
Tiles:	600 m²
Client:	Khansaheb Civil Engineering LLC
Main Contractor:	Khansaheb Civil Engineering LLC

- ✓ **Dubai Citibank (JBR)-K16-1604. Jumeirah. Dubai**

Floor Screed:	- 650 m², thickness – 100mm
Client:	Kinnarps Project Solutions LLC
Main Contractor:	Kinnarps Project Solutions LLC
Consultant:	Perkins + Will

- ✓ **Hotel Apartments (B+G+3P+16TYP+R). Business Bay. Dubai**

Floor Screed:	- 12,523 m², thickness – 70mm
Tiles:	- 1,800 m²

Client: REEM CAPITAL CONTRACTING LLC
Main Contractor: REEM CAPITAL CONTRACTING LLC
Consultant: CONIN INCORPORATED CONSULTANTS

- ✓ **Al Jaddaf Maria G+14 Residential, Dubai**
  Floor Screed: - 12,523 m²
  Tiles: - 3100 m²
  Internal Wooden Doors
  External and Service Fire Rated Doors.

- ✓ **Burj Vista. Downtown. Dubai. EMAAR**
  Ceiling Works in balcony – 5,000 m²
  Client: MIDLAND GROUP
  Main Contractor: CONSOLIDATED CONTRACTORS INTERNATIONAL COMPANY
  Consultant: TURNER INTERNATIONAL MIDDLE EAST LIMITED

- ✓ **KHANSAHEB. DIFC - GV11 Office Building. Dubai**
  Floor Screed: 3,773m², thickness – from 50mm up to 140mm
  Client: Khansaheb Civil Engineering LLC
  Main Contractor: Khansaheb Civil Engineering LLC
  Consultant: LACASA

- ✓ **PRIVATE VILLA - Palm Jumeirah, Frond F. Dubai**
  Floor Screed: 1,250m², thickness – up to 100mm
  Tiles: FLORIM stone 980 m²
  Wall tiles: Laminated Stoneware 360 m²
  Client: Private

- ✓ **DUBAI CREEK RESIDENCES IN DUBAI CREEK HARBOUR. Dubai**
  False Ceiling & Partitions: - 28,172m²
  Client: Al Basti & Muktha LLC
  Main Contractor: Al Basti & Muktha LLC

- ✓ **ANWA BY OMNIYAT (G+4P+44). Dubai**
  Partitions EcoWall: - 45,000m²
  False Ceiling: - 15,000m²
  Client: Gulf Perlite LLC
  Main Contractor: REEM CAPITAL CONTRACTING LLC

- ✓ **Expo 2020 Thematic Districts. Dubai**
  Floor Screed: - 23,000m²
  Client: Al Futtaim Carillion
  Main Contractor: Al-Futtaim Carillion

- ✓ **XXII CLUB VILLAS, PALM JUMEIRAH**
  Floor Screed: - 2,117m²
  Marble: - 600 m²
  Wall tiles: - Laminated Stoneware 360 m²
  Fly Net: - 128 m²

- ✓ **AL HUZAIFA SHOWROOM @ AL WASL**
  Floor Screed: - 1,963m²
  Microtopping: - 868m²

- ✓ **COSMOSURGE SPECIALITY HOSPITAL , JUMEIRAH**
  Floor Screed: - 850m²
  Epoxy coating: - 120 m²

- ✓ **Private VILLA Construction, Ras Al Khor Area**
  Floor Screed: - 1,200m²
  Porcelain Tiles: - 1100 m²
  Wall tiles: - 80 m²
  Microtopping: - 100 m²
  Client: Bin Lahej Contracting

- ✓ **Private VILLA Construction, Ras Al Khor Area**
  Floor Screed: - 700 m²

Microtopping: - 240 m²
Client: Bin Lahej Contracting

- ✓ **Private VILLA, Frond M, Palm Jumeirah**
  Guniting/Shotcrete: - 780 m²
  Microtopping: - 440 m²
  Marble renovation: - 120 m²
  Stretch Ceiling - 80 m²
- ✓ **Private VILLA, Al Khawaneej**
  Floor Screed: - 680 m²

  Automatic Aluminium Pergola: 16 m²
  Client: Private

PUMPED SCREED FLOORING

The Pumped Screed Floor System is the ideal solution for time critical upgrading of workshop, factory and general warehouse floors.

The finished screed is durable, tough and abrasion resistant. Placed at a minimum thickness of 7mm; up to 1,000m^2 of floor can be resurfaced per day. The rapid setting structural screed (30N/mm^2) is ready for traffic in less than 24 hours.

The Eclat STS screed system can be given a clear finish or sealed with epoxy in a variety of colours. When a coloured sealer is selected, the screed can be pigmented to closely match the coating which helps camouflage wear and tear. Pigmented screeds can also be finished with a clear sealer as an architectural solution.

What are the Benefits of using Floor Screed?

- Fast track installation.
- Provides an extremely tough and durable hard wearing surface.
- Leaves an attractive smooth finish.
- Fast setting (foot traffic within 2-3 hours).
- Large area application (up to 1000sqm a day).
- Environmentally friendly (solvent free).
- Can be over coated, or have floor coverings applied once set.
- Coloured screeds available.
- Can be polished to provide a gloss finish that is easy to maintain.

Where can I use Floor Screed?

- Refurbish and renovate old damaged concrete floors.
- Provide a hard wearing screed to new concrete floors.
- For quick application in areas and situations where downtime is at a premium.
- Where environmental matters are important.
- Due to the floor screeds anti static properties, floor screeds can be applied in plant rooms and laboratories where the risk of static build up needs to be eliminated.
- For floors that require a more attractive and professional finish.
- Commercial areas that desire an industrial look.

SAND CEMENT SCREED FLOORING SYSTEMS

To ensure a high quality installation is always achieved, we use ready mixed material, mixed and batched off site for quality control.

Sand and Cement Screed is widely understood as being the traditional floor screed. Sand and Cement make an ideal screed system which is suitable to receive almost any type of floor covering. It is a semi-dry system which makes it the best choice for floors that are required to be laid to falls.

Please Note: We would like to recommend that sand cement screeds should not be treated as a wearing surface and needs to be covered by a suitable floor finish.

We install sand cement screed floor to a high standard using quality materials and highly skilled staff.

RESIN FLOORING

An essential criteria in selecting a resin floor system is to ensure the correct products are selected, with the resin applied at the correct thickness to meet the intended service conditions.

There are different resin flooring systems available that are typically divided into epoxy, polyurethane and acrylic (MMA) resins. The different types of resin provide different combinations of application characteristics and through life performance and there are a number of factors to consider when selecting a resin flooring system. At ECLAT STS we have the knowledge and expertise to offer you sound professional advice on the most appropriate and cost effective resin flooring system to meet your operational requirements.

Critical to the success of any resin flooring system application is the level of surface preparation carried out before the resin can be laid. It is part of our ethos that detailed surface preparation is carried out on all our projects, where we will pay particular attention to the location, type and condition of Floor Joints, any surface contamination such as oil and grease etc, any cracking to the surface and the surface conditions.

Our aim is to ensure you have the best possible experience with your resin flooring project. Please contact us and let us be your guide.

Uses of Resin Flooring

Applied to offer protection to the concrete floor surface against everyday wear and tear.

- Protect floors from spills and chemicals.
- It can be applied in a non-slip finish for safety requirements.
- Add a decorative finish to enhance the appearance in the work place.

From the application of a basic sealer coat, through to a thicker trowel applied resin floor screed, Eclat STS have many years practical experience in the application of industrial resin floor systems.

PARKING FLOORING

Challenges for Parking Garage Floors

Every parking facility is different. Parking decks in multi-level garages, for example, have very special coating needs. Moisture intrusion can corrode the concrete slab from within, eventually contributing to weakened internal metal structures. Owners and operators want a cost-effective concrete deck coating system that can protect new concrete or restore older concrete surfaces. Concrete parking decks can suffer when they are exposed to:

- Fuels and oils
- Tire stains
- Freeze/ thaw
- Chlorides and carbonation
- Acid rain and other pollutants
- Snow, ice or hail
- Street salt
- Water intrusion

A good parking garage floor coating system should help prolong the life of the concrete structure as a whole. Eclat STS strives to find flooring that offers high performance, outstanding durability and safety for every facility's unique needs.

Using Concrete Finishes for Parking Garage Flooring Solutions

Multi-level garages can be expensive to keep well lit. The right concrete floor finishes, can ease this cost burden. The best epoxy floor coatings are available in light-reflective finishes that can help make dark areas brighter, enhance safety and reduce the need for additional lighting fixtures.

The parking lot may also need floor coatings that can accommodate the different levels of skid-resistance that may be needed in different areas within the structure. For example, pedestrian walkways and elevator lobbies should limit slippage, while still being able to withstand street shoe and cart traffic. Traffic lanes, parking slots and turning areas may have slightly different slip-resistance requirements, depending on building dimensions and design. Joints, cracks and concrete surface breaches also need to be addressed with the appropriate rigid or elastomeric materials. Eclat STS systems offer these safety options and more.

Epoxy Floor Coating Benefits

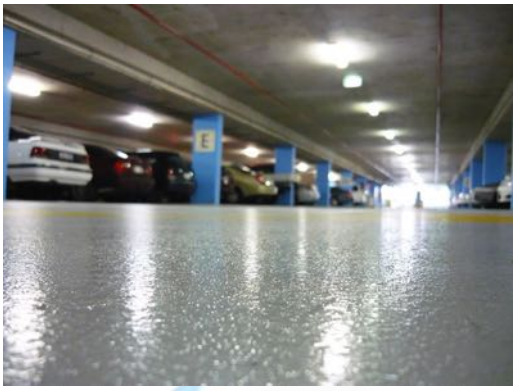
Eclat STS offers one of the broadest concrete coating lines on the market. Our floor options are comprised of many different polymer chemistries to help ensure parking lots have a full range of solutions from which they can choose, depending upon their needs and budget.

Our product lineup for commercial parking garages includes concrete coatings that are available in waterproofing underlayments, color stable, UV and weather-resistant finishes, as well as fast-turnaround and low temperature curing coating options. At Eclat STS, we offer a wide variety of high performance deck coating systems for garage floors, including:

- Systems that can adhere to damp concrete substrates
- Coatings that can cure in cool to very cold temperatures
- Systems that allow business as usual to resume within two hours of the coating application

These special properties can significantly lower installation labor costs—and help parking garages get back up and running as quickly as possible. Our team of regional tech representatives and local approved installers can help parking managers select the best epoxy floor coating value for their unique facility.

Contact our technical team to learn more about our full array of flooring solutions.



MICROTOPPING, METALLIC EPOXY

For interiors and exteriors, no stopping your ideas.
An innovative material that renews every surface with just 3 millimeters

The Continuous Space of Microtopping

Eclat STS Microtopping is perfect for those who want a continuous, innovative and tactile surface that can make any space unique, whether it is a minimal modern environment where Eclat STS Microtopping stands out as the main feature, or a classic, rustic or vintage environment, where it completes the style with refined discretion.
You can customize Microtopping by choosing shades and creating glossy, clouded, or acid stained effects to make it exactly the way you want it.

Innovative Material: Renew the surface in just 3 millimeters

With just three millimeters of thickness, microcement Microtopping allows you to renew existing surfaces on different bases (concrete, self-levelling, ceramic, wood…) without having to remove them.
Microtopping is extremely resistant to changes in climate, easy to clean and fast to install. It is also perfect where underfloor heating is used.

What is a metallic epoxy floor coating?

A metallic epoxy floor coating is quite simply a low yellowing epoxy, with a metallic pigment mixed within. In other words, tiny, almost glitter-like pigments are mixed into an epoxy resin and then poured onto the floor or substrate. When these pigments become agitated with a paintbrush or roller, they gather, separate, twist and turn to reflect light at different angles. Eventually, the epoxy hardens and the metallic pigments are locked into place and give a three dimensional, swirly look. The installation technique is what determines the final look of the floor and is a critical part in attaining the desired look.

WATERPROOFING

Wet areas under tiling

This application is for any wet area under tiling which will be in direct contact and reputable using of water such as kitchen, bathroom, and others in residential or commercial buildings in either on new building or for repairing old ones. In both cases, a waterproofing system needs to be applied under tilling (the wet area) in order to protect the concrete and prevent any water leakage.

Polyurethane liquid membranes

Liquid applied polyurethane waterproofing membranes for different applications and specifications from retaining walls to rooftops.

Cement-based waterproofing

Cement base waterproofing products for swimming pools, water tanks, foundations....

Acrylic-based waterproofing

Acrylic based flexible waterproofing products for under-tiling area and roofing.

Bituminous liquid membranes

Cold applied bituminous coating primers and rubberized bituminous emulsion that acts as general waterproofing, damp-proof membranes and vapor seal for a variety of substrates.

GYPSUM BOARD CLADDING/CEILING

Gypsum Plastering

Gypsum plastering is a modern day solution to time consuming and ecologically straining process of Sand Cement plaster. Further it saves on POP punning cost which is generally applied on Sand Cement plaster. Gypsum plasters have been used for centuries in the construction space, owing to its excellent and unique properties. It provides excellent thermal and acoustic properties while providing undulation free line and leveled walls with superior finish.

Ceilings

Ceilings are one of the important elements of an interior space as they offer the maximum unobstructed view of working spaces. As a result, the ceiling is an important element of open plan office layout and defines its aesthetics. Since a ceiling has a large surface area, it plays an important role in the acoustic and thermal comfort of a space.

Drywalls

A drywall is a high performance lightweight interior wall system consisting of a GI steel frame, encased in gypsum plasterboards on either side, attached with self-drilling drywall screws. The joints are then taped and finished with gypsum jointing compounds.

FACADE CLADDING SERVICES

Owing to our rich industry experience, we are engaged in offering Building Facade Works, exterior wall cladding, toughened glass cladding, building elevation. ECLAT STS also offer 3d design of buildings. Service includes external facade for various building, be it GRP, GRC, Glass, ACP. Our expert engineers work closely with our clients to realize their perception and execute this service accordingly. We offer one of the highly reliable services in facade, which can't be availed from anywhere else.

Other details:

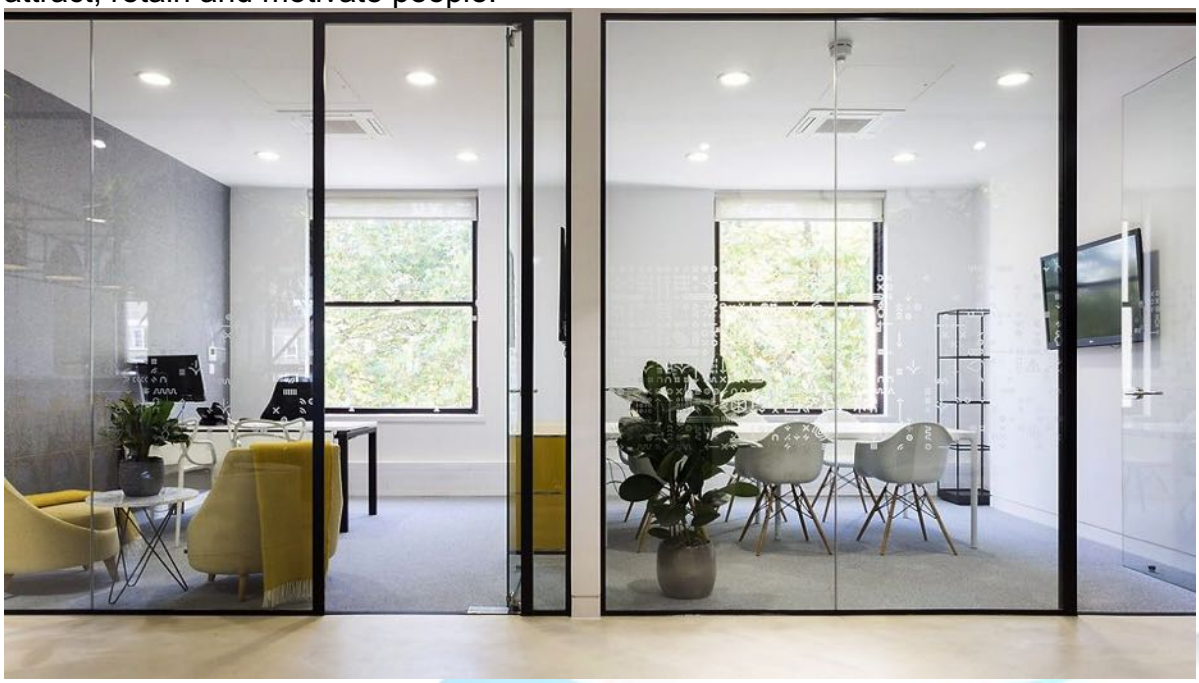
Completed as per the aspirations of our patrons:

- Timely completed
- Prepare and plan the structure before executing

FIT-OUT WORKS

Delivering high-quality tailored fit-out projects that transform commercial spaces.

Eclat STS is responsible for a wide range of industry-leading commercial and private fit-out projects across the UAE.
Whether the ambition is to improve wellbeing, develop efficiencies or inspire individuals, our broad experience and industry knowledge of commercial fit-out sees us add value over and above our clients' expectations.
We respect the trust that our clients put in us to rise to the challenge. Far more than office spaces, we understand the impact that commercial interiors have on businesses - reducing costs, reflecting unique cultures and supporting companies to attract, retain and motivate people.



We strive to create interiors that people enjoy working in, and we do our utmost to make the journey as enjoyable as the destination. Our approach will always be focused on delivery. By that we mean we will offer an excellent service throughout the entire project, working transparently and collaboratively and keeping programmes flexible to our clients' needs, and we'll remain with you after the project completes so that your transition into your new offices is seamless.
As our business has developed, one thing that remains unchanged is our entrepreneurial spirit and commitment to innovation. So whether we're working on a shell and core or a Cat A or B fit-out project, we will always seek new ways to save our clients time and money while raising the quality of delivery.
Based in Dubai, and with the capability to deliver nationwide, our specialist teams offer client focused and bespoke approaches to projects ranging from AED50k to over AED5m. We work predominantly within the commercial office sector but due to our innovative nature and highly experienced people are often the 'go to' contractor for highly specialist fit out projects outside of the norm.

PRIME PERGOLA

Provide yourself with protection from the sun, the rain, and other elements using an aluminium/wooden pergola. Thanks to our pioneering designs, you can get a shade that suits every architectural style. Besides that, we offer several options for the louvres. You can have fixed or movables ones and also a choice between a blade for the motor motion a manual crank system for manual movement.

The aluminum pergola is an integrated shading system that enables protection from sunlight, for a unique shade especially during the summer months, but also the possibility of rain protection. Pioneering design is fully in harmony with every architectural style. It is possible to construct a pergola system with fixed and movable louvres, using a motor for blade movement, but also a manual crank mechanism for manual movement.

MARBLE SERVICES

MARBLE RESTORATION, STONE POLISHING, REPAIR & TILING

Marble is a spectacular natural stone and loved by many nationality due to its longevity, durability, appeal and elegance. If you have marble floors or benchtops in your home or business, then it creates a space of pure sophistication and makes any room look beautiful.

But if marble isn't cared for properly, it can lose its appeal, shine and seem damaged and dull, which means it won't have its luxurious appearance anymore. There are many things which can cause the marble to lose its shine, such as liquid spills, foot traffic, or using the wrong chemicals to clean it with. If this happens to you marble then over time, there is the potential for it to get scratched and lose its stunning look.

If you have marble in your home or business, then we're specialists in marble polishing, marble restoration and marble repair on all types of surfaces. Marble polishing is an essential part of caring for your marble floor and marble surfaces so they'll continue to glow, look brand new and striking.

ESTS Marble Polishers

We're the Dubai marble repair and restoration specialist team who delivers 5-star quality when caring for your surfaces. With an eye for detail and expertise in transforming stone surfaces to their original glory, our marble restorations team will put the magic back into your stone surfaces.

We're Dubai experts in working with all surface types and every natural stone element,

- Polished marble
- Marble granite
- Marble floor
- Stone bench tops

So if you're looking for stone cleaning and restoration specialists in UAE on all types of surfaces then contact us today.

Why Marble Needs Polishing

- Gets rid of cracks, stains and dullness
- Restores the stone to its original shining finish, so it looks brand new again
- Maintains and preserves the marble to give it an extra layer of protection
- Reduces dust and grime
- Restores brightness into the area
- Provides a finish which makes regular marble maintenance and cleaning easier
- Reduces the amount of routine cleaning it needs so you'll have more time in your day

DEDICATED TO DELIVERING OUR QUALITY TO ALL OF UAE.

ESTS started, we have always been focused on delivering our high quality service to all our clients – guaranteeing they get what they want. We not only want to make our clients happy with our service; we want to astound them with our designs and finishes. You will see our magic right in front of your eyes and witness the positive changes that will happen we will restore your stone floors. As leaders of stone restoration, you can experience the following from our team of experts:

- Passionate provider of high quality stone restoration services
- Tailored service based on your requests and desires.
- World leading technology and machinery
- Refined and precise methods that will deliver your results.
- Maintenance programs designed to provide you with year-round perfect floors

FLEXIBLE GLASS DOORS

PR-200 flexible glass door with heavy duty rail

INAL® Frameless Movable Glass System, parking-type, with heavy duty certified aluminum rail 70 mm x 80 mm with embedded stainless steel rod & certified stainless steel rollers. Unlimited design possibilities for parking areas (vertical, diagonal or parallel parkings). Ability to create swing door panel with overhead concealed door closer in intermediate sections of openings (PR200/ SOC). Weather proofing along the entire length of the panel (PR-F200). Locking with Stainless steel front or side bolts or locking with double locking lock mechanism.
Available in Do It Yourself (DIY) or Made to measure upon request.

PR-200/R76 flexible glass door with heavy duty rail

INAL® Frameless Movable Glass System, parking-type, with heavy duty certified aluminum rail 55mm x 76mm with embedded stainless steel rod & certified stainless steel rollers. PR-200/ R76 System is the proposition for easily self guided storage of the flexible glass panels. Ability to create swing door panel with overhead concealed door closer in intermediate sections of openings (PR200/R76SOC). Weather proofing along the entire length of the panel. Locking with Stainless steel front or side bolts or locking with double locking lock mechanism.

Available in Do It Yourself (DIY) or Made to measure upon request.
